

VADODARA, INDIA

Industrial Efficiency: Thermal Insulation Solutions

Precision-engineered PUF and PIR systems by **Vivan Industries** — reducing energy waste, cutting costs, and powering sustainable industrial operations across India.

Made with **GAMMA**

The Hidden Cost of Heat Loss

30% Energy Lost

Nearly one-third of industrial energy is wasted through poor or absent insulation — a silent drain on your bottom line.

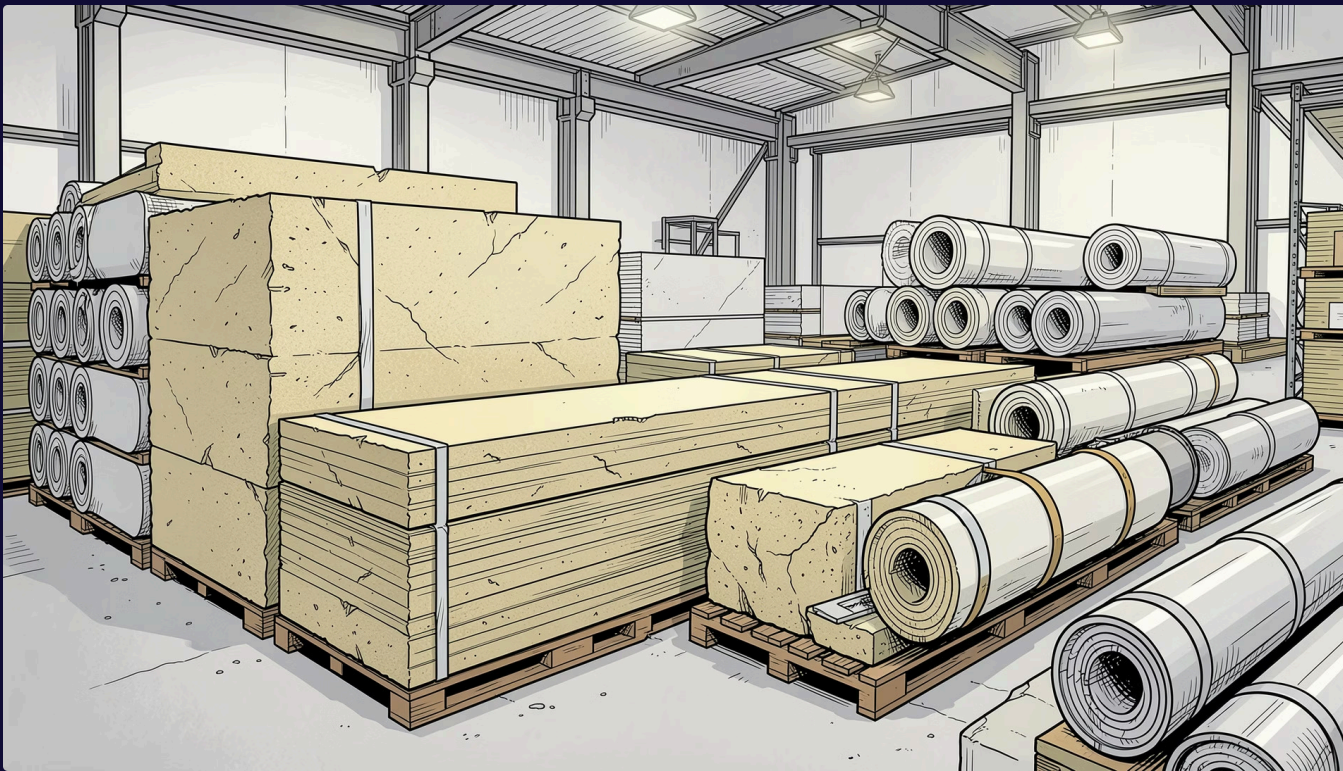

Rising Operational Costs

Inefficient thermal systems force equipment to work harder, accelerating wear and driving up maintenance and energy bills.

Vivan's Precision Solution

Engineered PUF and PIR systems target heat loss at the source, delivering measurable savings from day one.

Engineering Performance: Our Product Suite

Ultra-Low Thermal Conductivity

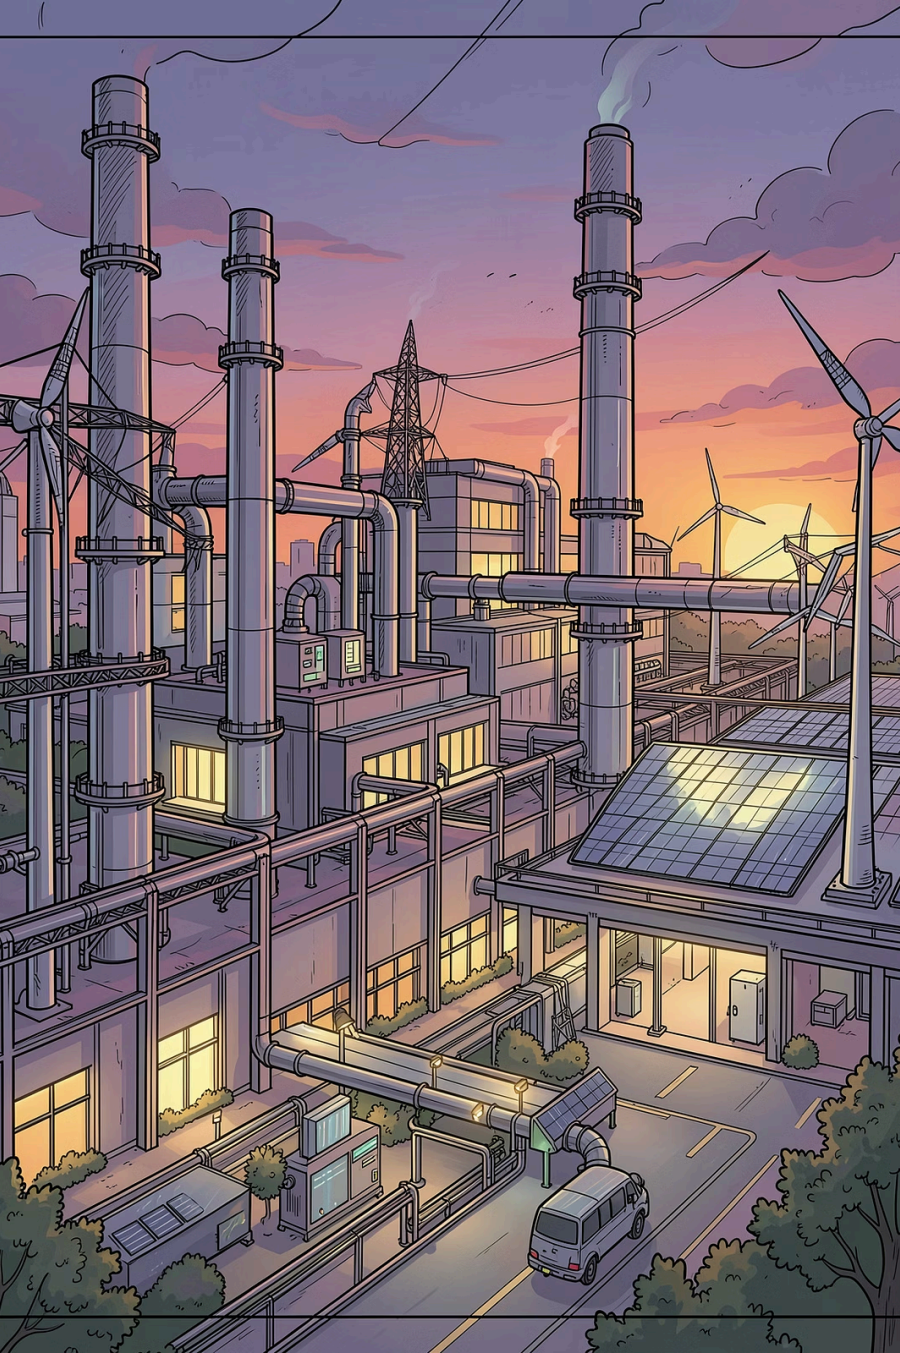

PUF & PIR slabs achieve conductivity as low as **0.020 W/mK** — among the best in the industry.

Extreme Temperature Range

Specialized pipe sections engineered for environments from **-196°C to +140°C**.

Sector-Specific Solutions

Sandwich panels and in-situ foam services tailored for **petrochemical, pharmaceutical, and cold storage** sectors.

Partnering for a Sustainable Future

Since 2015, Vivan Industries has grown from a regional supplier to a **national leader in energy-efficient insulation** — helping industries across India advance toward Net Zero goals.

Our Location

Brushellz Industries Park,
Vadodara — delivering
nationwide expertise.

Our Mission

Reducing industrial thermal
footprints to support India's
sustainability targets.
