EXPORT-READY

Roots in Vadodara: The Evolution of a Manufacturing Powerhouse

Founded with Purpose

Established on 30 November 2015 in Vadodara, Gujarat — Vivan Industries began with a clear vision to redefine thermal insulation manufacturing in Western India.

Strategic Logistics Advantage

Positioned on NH-8, one of India's most critical freight corridors, enabling seamless distribution across all major industrial hubs nationwide.

From Chemicals to High-Tech Manufacturing

Evolved from chemical supply origins into a **high-tech insulation manufacturing powerhouse**, investing in advanced equipment and process engineering.

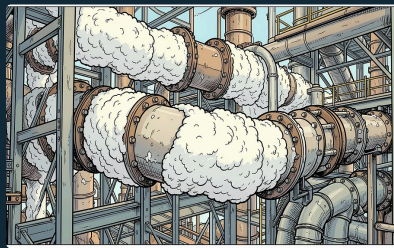

The 2026 Arsenal: Engineered Efficiency

Vivan Industries offers a comprehensive range of PUF insulation products engineered for the most demanding thermal environments.

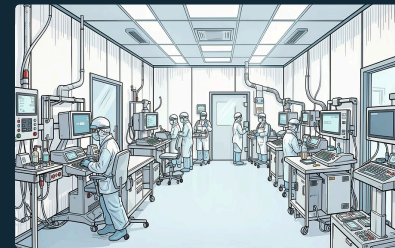

PUF & PIR Slabs

Industry-best R-values up to 6.5 per inch — delivering superior thermal resistance for walls, roofs, and cold storage structures.

Seamless Pipe Sections

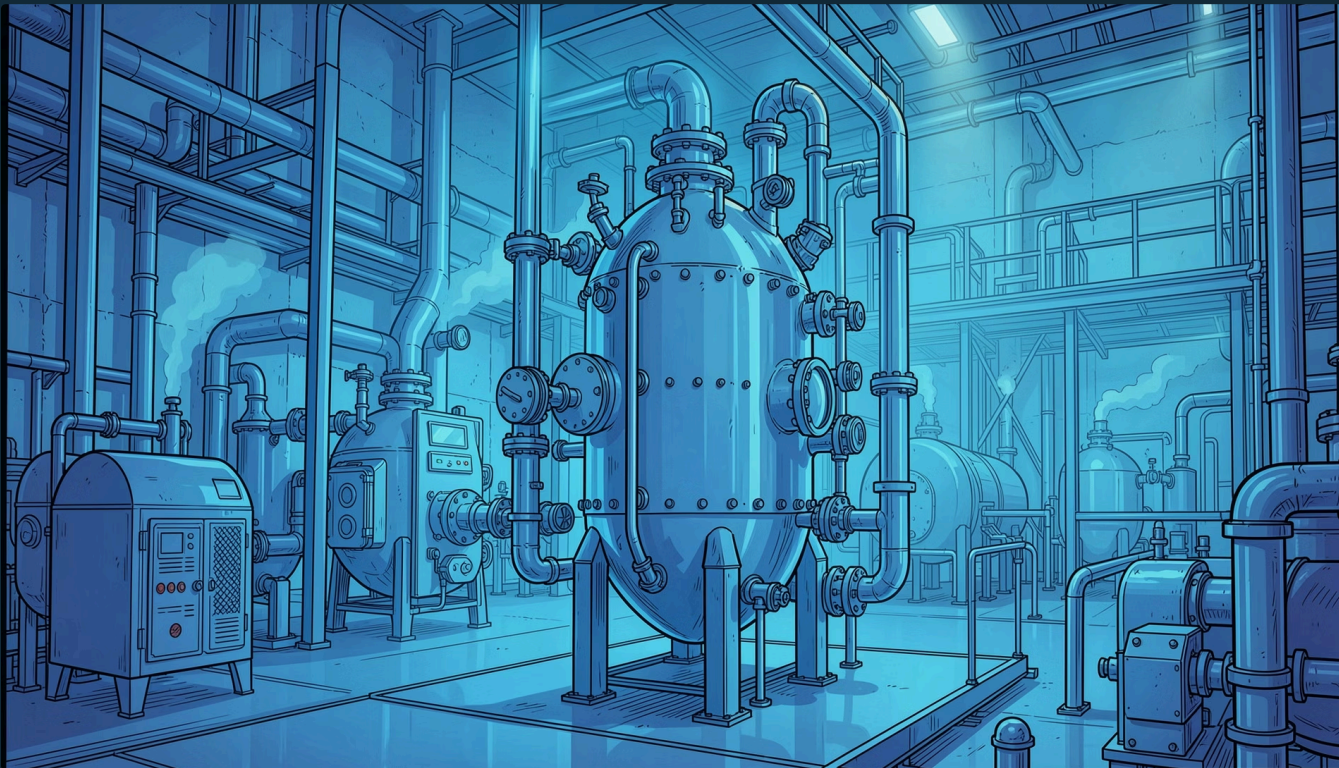

Purpose-engineered to protect critical infrastructure across an extreme range of -196°C to $+140^{\circ}\text{C}$.

Specialised Solutions

Fire-retardant Class 0 grades for pharmaceutical cleanrooms and custom cold-storage sandwich panels meeting stringent safety codes.

The Strategic Edge: Precision Performance

Manufacturing Precision

Advanced high-pressure reactors ensure precise PUF/PIR density control and batch-to-batch consistency — the foundation of Vivan's quality promise.

Proven Across Critical Sectors

- Petrochemical & Refineries
- Pharmaceutical & Life Sciences
- Large-Scale Industrial Cold Storage
