

Soluciones fiables de detección de gases para seguridad industrial y cumplimiento normativo

4-in-1 Multi Gas Monitor

Multi-gas monitor for monitoring concentration levels of four different types of gases in the environment. The gases that the 4S multi-gas monitor can detect are oxygen, carbon monoxide, hydrogen sulfide, and explosive gases (LEL).

ES10B Fixed Gas Detector – Combustible, Toxic and VOC Gases

The ES10B fixed gas detector is a line transmitter with an LCD display that continuously measures the gas concentration on site and transmits the reading via 4-20 mA analog output, RS485 digital communication, or both simultaneously, plus two passive relays to trigger alarms or external equipment.

BG40 Combustible Gas Detector Explosimeter

The storage and use of flammable gases, such as natural gas, methane, ethanol, and propane, pose a significant risk in everyday life. Therefore, the airtightness of explosive gas storage facilities, as well as gas pipelines, gasoline tanks, and valves, must be regularly checked with a gas detector like the BG40.

XA-4000II Series – Portable Multi-Gas Detector (LEL, O₂, H₂S and CO)

The New Cosmos XA-4000II series is a high-performance, portable, multi-gas personal detector designed for continuous protection of personnel working in hazardous environments and classified areas. This single compact unit allows for the simultaneous

LD 6000 Combined Water Leak Detector Geophone

The Trotec LD 6000 is a professional all-in-one water leak detector for acoustic leak detection , tracer gas (H₂) detection , and pipe tracing . It processes extremely faint leak noises using a high-quality microphone and advanced electronics, displaying the information on a clear and easy-to-read color screen .
