

Meet the Specialist Doctors Behind South Delhi's Most Trusted Microhospital

[Pacific OneHealth](#) is a growing chain of microhospitals operating across South Delhi, with facilities in Lajpat Nagar, Dwarka, and Karol Bagh. Built around the belief that specialist care should exist where people live, not just in large hospital districts, the group offers more than 35 specialties under one roof, including Cardiology, Neurology, Orthopaedics, Gastroenterology, Gynaecology, Oncology, and Fertility Medicine. With over 2,500 patients treated, 50+ specialist doctors, and a 4.9 Google rating, it has quietly become one of the most trusted healthcare destinations in South Delhi.

The Doctors Making It Work

A hospital is only as good as the people inside it. The [Best Multispecialty Doctors in South Delhi](#) are not names you stumble across easily. They are clinicians with decades behind them practitioners who have built their reputations in Delhi's medical community long before joining this group. Four of them define what this hospital stands for.

Dr Mohsin Wali - A Career That Speaks for Itself

Not many physicians carry both a Padma Shri and a record of serving three former Presidents of India. [Dr Mohsin Wali](#) does. With over 45 years of clinical experience in Internal Medicine and Preventive Care, he has been recognized as Best Physician in Allopathy by the Union Health Minister and received a Lifetime Achievement Award in Medicine. His qualifications, MBBS, MD, FACC, FRCP span general medicine, cardiology, and geriatric care.

Dr. Mohsin served as personal physician to Presidents R. Venkataraman, Shankar Dayal Sharma, and Dr. Zakir Hussain. He has authored chapters in standard medical textbooks and contributed to leading journals. He consults at the Lajpat Nagar facility Monday to Saturday. For South Delhi patients, access to a doctor of this standing locally, without weeks of waiting is genuinely rare.

Dr. G. S. Grewal—Decades of Eye Care in One Address

Vision problems do not wait. Cataracts, diabetic retinopathy, glaucoma these conditions develop quietly and worsen without the right specialist. [Dr G S Grewal](#) brings decades of surgical ophthalmology experience to the group. His patient following in Delhi has been built over years, and his reputation for precision in eye surgery is what draws families looking for an ophthalmologist they can actually trust with something as serious as sight.

His presence at the facility means patients do not have to navigate a tertiary hospital or a long referral chain to get the right opinion on their eyes.

Dr. Naval Bhatia—The Principal Director Who Built the Model

Hospitals do not run on credentials alone. Someone has to decide how the departments connect, what the patient experience looks like, and whether the specialists are actually present or just affiliated on paper. [Dr. Naval Bhatia](#) serves as Principal Director of the group and has been the architect of how these facilities operate.

The decision to build dedicated Centres of Excellence for Vertigo, Pain Management, Uro-Andrology, Bariatric Surgery, and Daycare Oncology rather than generic outpatient departments reflects his clinical priorities. The model works because someone with medical judgment, not just administrative ambition, designed it.

Dr Anirban Biswas — The Vertigo Specialist South Delhi Needed

Vertigo is one of the most mishandled conditions in outpatient care in India. Patients cycle through general physicians for months, get told it is stress, and never see the specialist who can actually diagnose what is happening in their vestibular system. [Dr Anirban Biswas](#) heads the dedicated Vertigo and Balance Disorders Centre of Excellence at Lajpat Nagar.

His programme runs proper vestibular assessments, balance rehabilitation, and condition-specific treatment protocols. For South Delhi residents who have been managing dizziness episodes without real answers, his availability here changes things considerably.

Conclusion:

These four doctors represent what happens when a hospital is built around clinical quality first. Patients returning, referrals growing, and a 4.9 rating sustained not through marketing, but through consultations that people actually leave satisfied from.
